It was our impression that ATSDR may be able to make a determination or response prior to receiving a year's worth of data; however that decision needed to be made at a higher level. Want to know if there's any possibility that ATSDR may make a statement earlier than we originally thought.

Lots of discussions. Refresh my memory what you need from us in light of the NOV.

Wanted to touch base and see if any decisions were made as a part of your discussions this

week.

This, of course, requires more discussion, and with CDC. We are meeting next week and are starting with Q&As today. When do you think the data will be posted?
